

East Tennessee 2 Meter Nets and Repeaters Directory

Mission Statement:

To facilitate Ham Radio licensees getting full use and benefit of the 2 meter repeaters in ETN and to inform non Ham licensees of the possibilities with Ham Radio and motivate them to get their license.

Latest version 190820. PDF copies will be free and printed copies will be \$5.00. This is a work in progress (and will always be) and we need a lot of help. This directory was developed using Rtsystem radio programing software, RepeaterBook and SERA. For Questions, Corrections, and Additions
 Contact: Bob Hill at KK4VAS@gmail.com

Nets	2
Top Twenty Repeaters in ETN.....	9
250 Repeaters Within 114 Miles Of Knoxville.....	10
Getting a License.....	24
Helpful Web Sites.....	27
Finis.....	29

Value And Purpose Of This Directory:

- > To help people get active in ETN Ham Radio
- > To Facilitate the finding of nets to listen to and clubs to attend.
- > Protect nets from interference.
- > Help new Hams to get a quick start in undertanding and use of the 2 meter band.
- > Help non Ham (listeners) to get interested in the Ham Radio world by listening to nets. The hope is they will get intertasted enough to get their license.

How it Works:

The information on the nets and clubs is in the right column and is arranged (by the columns to the left) according to the day of the week and the time of the day and the frequency. When you want to see the information for a certain day of the week, go to the collection of entries for that day and look for the time and frequencies. Use the search or find function in your software to find frequencies and geographical names.

The value of this directory is twofold:

- 1. Static** (looking at the data in the three tables as it is, as you would read a printed document).
- 2. Dynamic** sorting the data so as to see particular things grouped in special ways, This cannot be done in the free PDF reader and is best done in Apache OpenOffice the leading open-source office software suite for word processing, spreadsheets, presentations, graphics, databases and more <https://www.openoffice.org/download/index.html>)

Nets

		147.075	<p>wb4gbi The 147.075 (+) repeater is located on McKinney Ridge, in the city of Knoxville, TN. on the west side of town, near the intersection of Interstates I-40/75 and I-640.</p> <p>Instructions for using the WB4GBI Autopatch:</p> <ul style="list-style-type: none"> > Key your mic and identify yourself, with your intentions to use the autopatch... Such as: "This is WX4ABC accessing the Autopatch..." >with the mic still keyed, and using your DTMF buttons... enter the (*) key.. followed by the 7-digit phone number. (No Long Distance numbers will be accepted) >Release the mic key... and listen. If the autopatch is accessed correctly, it will repeat back to you "Accessing Autopatch..." (followed by the number you just dialed) >You will then hear a series of beeps... while the machine dials your number. In a few moments, you will hear the phone ringing... then your party will answer. >Note: Be sure to tell them they are on an autopatch, so they will know the conversation is being transmitted! >Carry on your conversation as normal - releasing your mic to hear the other party's responses. > (Note: There is a 4-minute limit to each autopatch session!) >To hang up... simply key your mic, and press the (#) key -then release. >The Autopatch will hang up the phone, then ID itself... give the time... then ask you to "Please Identify..." >Give your callsign to let everyone know that you have finished using the autopatch, and have returned the repeater to normal use. This machine is located just West of downtown Knoxville, making it perfect for local use. It features an auto patch, a voice ID system and emergency backup power, which make it perfect for Emergency use in the urban areas of the city of Knoxville, while other larger scale coverage machines might be needed for larger-scale regional emergency communications. <p>http://www.wb4gbi.com/middlebrook.html</p>

1 Sun	2000	146.790	This Net is an open Net and is not affiliated with any club. All properly licensed HAMs are welcomed and encouraged to join us! We usually have between 40 and 60 check-ins, and our goal in 2019 is to grow that to 70+! The Chattanooga Sunday Night Net generally follows the schedule below, but at times we do move things around to accommodate something. The Net is held every Sunday evening beginning at 2000 (8pm eastern time) on the K4VCM 146.790 repeater, which is located high atop Signal Mountain in Chattanooga, TN (no tone is required, this is a Fusion repeater and does transmit 107.2 TSQL). 2 Mon	1930	146.730	Wb4gbi English Mt Swap & Shop 146.73 - Th 8:00 PM The 146.73 repeater is one of East Tennessee's "Heritage" repeaters, having been placed on the air in 1974 by Sam (WB4HAP) and Matt (WB4IOB) Kirby. When the FCC was issuing licenses for repeaters, the 146.73 repeater held the call sign of WR4APU. The repeater had been operated maintained by Sam and Matt until Sam became a silent key in 2007. Tim acquired this repeater from Sam's estate on September 12, 2007... and moved the machine from Sam's home, to his own home, where it underwent some major refurbishing. It has been located in two other buildings before reaching this destination building in January 2016. The new Sinclair SD-224 and the 7/8" heliax was also installed. 5 Thu	2000	146.730	Wb4gbi English Mt Swap & Shop 146.73 - Th 8:00 PM The 146.73 repeater is one of East Tennessee's "Heritage" repeaters, having been placed on the air in 1974 by Sam (WB4HAP) and Matt (WB4IOB) Kirby. When the FCC was issuing licenses for repeaters, the 146.73 repeater held the call sign of WR4APU. The repeater had been operated maintained by Sam and Matt until Sam became a silent key in 2007. Tim acquired this repeater from Sam's estate on September 12, 2007... and moved the machine from Sam's home, to his own home, where it underwent some major refurbishing. It has been located in two other buildings before reaching this destination building in January 2016. The new Sinclair SD-224 and the 7/8" heliax was also installed. 6 Fri	1900	146.940	METERS Hospital Nets General Information The Middle East Tennessee Emergency Radio Service Club coordinates a monthly hospital net the last Friday of each month to test Knoxville area hospital emergency ham radio stations at each hospital site. The exercise is part of the Knox County Health Department Emergency Operations and the Knox County Emergency Management Agency. Area hospital's in

			<p>East Tennessee are invited to check into this net. Meters coordinates Knoxville area hospital emergency ham radio communication and can offer help to area hospital ham radio clubs or groups deployed to their respective hospitals as part of the regional emergency management and health department emergency plans. Net Preamble This IS A MONTHLY directed net conducted by the Middle East Tennessee Emergency Radio Service, Inc., in cooperation with the KNOX COUNTY HEALTH DEPARTMENT AND PARTICIPATING REGIONAL HOSPITALS. This net opens and meets one Friday evening* a month at 7 pm* Eastern Time on this 146.940 repeater. Our alternate opening frequency is the 146.625 repeater. This net is limited to short checks of emergency equipment at several area hospitals, on several frequencies and typically lasts less than 45 minutes. - This is both an equipment check, and training net. Authorized and licensed amateur radio communicators operating regional hospital emergency stations are invited to participate using their hospital tactical call sign along with their own call sign. Additional information about METERS nets can be found on the Internet at www.metersinc.org. As you check in, please give your tactical call sign phonetically, followed by your FCC call sign, and identify call signs of those operators assisting at your location. Also please give us a signal report for other hospital stations heard on the net. Net control will acknowledge each check-in. Net Frequencies The following repeaters/frequencies are used for the net (in this order):</p> <ul style="list-style-type: none"> • #1 146.940 • #5 147.075 • #2 147.300 • #26 147.420 Simplex • 144.210 USB Simplex • #17 444.300 UHF • #24 28.420 USB

http://www.weather.gov/mrx/skywarn_classes	Skywarn The effects of severe weather are felt every year by many Americans. To obtain critical weather information, NOAA's National Weather Service (NWS), part of the U.S. Department of Commerce, established SKYWARN® with partner organizations. SKYWARN® is a volunteer program with nearly 290,000 trained severe weather spotters. These volunteers help keep their local communities safe by providing timely and accurate reports of severe weather to the National Weather Service. Although SKYWARN® spotters provide essential information for all types of weather hazards, the main responsibility of a SKYWARN® spotter is to identify and describe severe local storms. In the average year, 10,000 severe thunderstorms, 5,000 floods and more than 1,000 tornadoes occur across the United States. These events threatened lives and property.

	<p>hams are welcome to try them out when in the area. I have been an amateur repeater owner since 1981. Presently, I am employed as the Chief Engineer WUOT-FM, The University of Tennessee's NPR station. Previously, I was the Chief Engineer for the Cumulus Stations in Knoxville (WIVK/WNML/WOKI). I still serve as their backup engineer. I am also the Engineer for WJBZ-FM, WLAF-AM, WLIK-AM, WCLC AM/FM, and WGSN-FM in the Knoxville area. I am also the Chief Engineer and Technical Director of the Vol Radio Network, which broadcasts the University of Tennessee football, basketball, and baseball games. My XYL of 34 years is Tammy, KB4TQO, and we have a daughter, Paige. Please check out my website which shares information about the repeaters: http://www.wb4gbi.com. Thank you for visiting my QRZ page!</p> <p>First licensed in 1973 as WN4GBI, Tim Berry has been active in East Tennessee Amateur Radio for 46 years. He has held the Amateur Extra Class license since 1982, and also holds the FCC Lifetime General Radiotelephone license (previously the FCC First Class Radiotelephone license) since 1978. He is certified at the CBRE level by the Society of Broadcast Engineers and is also a member and past president of the Radio Amateur Club of Knoxville (RACK). He is a member of the Middle East Tennessee Emergency Radio Service (METERS). Tim was a Director and Frequency Coordinator for the South Eastern Repeater Association (SERA) from 1990-2004.</p> <p>All the repeaters maintained by Tim are located in the Knoxville, TN area, and are open to all Amateur Radio Operators. Any & all hams are welcome to try them out when in the area. Tim has been an amateur repeater owner since 1981.</p> <p>Tim is presently employed as the Chief Engineer of WUOT-FM/HD1/HD2 at the University of Tennessee. Prior to returning to WUOT in July 2017, he spent 20 years as Chief Engineer for the Cumulus Media Stations, WIVK-FM, WNML AM/FM, and WOKI-FM. In addition, He also is the broadcast engineer for WJBZ in Knoxville, WLAF in Lafollette, WLIK in Newport, WGSN in Newport, and WCLC-AM/FM in Jamestown. Tim also provides engineering services to WYLV-FM, WOFM-FM, and WMXK-FM, which are owned and operated by Educational Media Foundation (K-Love and Air 1).</p>
	<p>W4KEV From https://www.qrz.com :</p> <p>Welcome from Knoxville and East Tennessee! This is an Amateur radio paradise and one of the most beautiful places on earth. Please feel free to use one of the following repeaters if you happen to visit this part of the country. On VHF, 145.370, t100.0 in Knoxville, 147.195, t100.0 in Gatlinburg, 147.345, t118.8 in Crossville and 145.410, t127.3 in Greenville, all linked together to give coverage from Nashville to Asheville and you can also use Echolink on all the repeaters as well "Node 459455". 145.230 t103.5 in Knoxville is a stand alone repeater with great people and excellent coverage of the area. 53.250 in Knox county and 53.930 "With coverage from Nashville to Knoxville" in Cumberland co. have the area's widest coverage. Also, go to MTEARS.org where you will find a map of all the uhf linked repeaters that cover east Tennessee and the rest of the state. If your visiting this area please drop in to talk or ask for help. Also, if you use any digital modes, 441.8375 is P25, 440.550 DMR and 145.100 uses D-STAR and all are located in Knoxville, TN. W4KEV repeaters are on facebook.com and you can get the entire list from Repeaterbook.com.</p>
